LIBERTY
THE HIGH-SPEED INDUSTRY LEADER FOR ACCURATE MOTION TRACKING

INDUSTRY STANDARD
When only the best will do, LIBERTY is the top choice motion tracking system for professionals and top researchers that require high-fidelity performance.

HOW IT WORKS
LIBERTY™ utilizes a source that emits an electromagnetic field. Sensors within the field of range are tracked in full 6DOF (6 Degrees-Of-Freedom) at an impressive 240Hz per sensor. Set-up is simple and intuitive and the system is easily portable. Due to the nature of the technology, there is no need for a line-of-sight for continuous tracking. LIBERTY delivers an uninterrupted stream of data for high-fidelity tracking.

HIGH PERFORMANCE AND SCALABLE
Two models are available and both are upgradeable. Simply add additional sensors to the existing system, or increase capability further by upgrading with additional hardware for the maximum number of sensors—up to 16 sensors available per system!

LIBERTY 240/8 offers 4 sensor channels; upgradeable to 8.
LIBERTY 240/16 offers 4 sensor channels; upgradeable to 8, 12, or 16.
